

lucemioSM 
Outsourcing Solutions

lucemio can help you to gain customer insights and operational efficiencies.

We can help you to better understand customer behavior down to SKU and even the store location so that you can optimize your forecasting, supply chain and increase your sales. In addition, we can help you to optimize staffing levels to help control costs. With lucemio, you can get the insights you need to give your customers the products they want so that you can boost sales and customer loyalty all at the same time!

BPO

Benefits & Process

Key Benefits

Improved Outcomes

Our BPO helps you to easily **resolve blind spots** within your business processes by **increasing visibility** in key business areas.

Competitive Advantage

The ability to **flex your resources up or down** **augments your cost structure** while ensuring you **receive actionable analytics and reports**.

Improved ROI

Our BPO leverages global talent managed from the United States to **assure you quality, compelling economics and improved ROI**.

Core Process

Build

We'll **agree on the frequency and deadlines for the deliverables to be transferred to us** and outline the requirements for each of those deliverables.

Access

We'll work with you to **ensure that we have secure access to the datasets** that we need to be able to perform our manual analysis on your behalf.

Retrieve

Once completed you'll **retrieve your deliverables** from your own system or our secured storage Cloud **and sign-off** on those deliverables.

Help your Retail company to
outperform with our BPO solutions.
