

lucemioSM 
Outsourcing Solutions

lucemio makes life easier by helping you to pulse your company's financial health.

You work cross-functionally to weave the holistic story that is your company. Challenges stem from fielding ad hoc requests from the very departments you work with not to mention fielding requests from your CFO. You're expected to "hit your numbers" which requires consistent pulsing of the revenue levers that drive top-line growth, while simultaneously managing the expense levers that can hurt bottom-line growth. You're also charged with understanding trends and top drivers that deviate from the operating plan. We know that it can be overwhelming, but lucemio can make your life a lot easier.

We understand your challenges and these are just a few ways we can help you:

- What-if scenario planning and forecasting
- Vendor benchmarking
- Financial reporting
- Spot trends and patterns
- Perform root cause analysis
- And, many more analytics...

BPO

Benefits & Process

Key Benefits

Improved Outcomes

Our BPO helps you to easily **resolve blind spots** within your business processes by **increasing visibility** in key business areas.

Competitive Advantage

The ability to **flex your resources up or down** **augments your cost structure** while ensuring you **receive actionable analytics and reports**.

Improved ROI

Our BPO leverages global talent managed from the United States to **assure you quality, compelling economics and improved ROI**.

Core Process

Build

We'll **agree on the frequency and deadlines for the deliverables to be transferred to us** and outline the requirements for each of those deliverables.

Access

We'll work with you to **ensure that we have secure access to the datasets** that we need to be able to perform our manual analysis on your behalf.

Retrieve

Once completed you'll **retrieve your deliverables** from your own system or our secured storage Cloud **and sign-off** on those deliverables.

Help your Finance team to outperform
with our customized BPO solutions.
